ABOUT ME

I'm a program coordinator from an NGO turned web developer passionate about combining beautiful code with a beautiful design that brings out intuitive, pixel-perfect user experiences. I also love learning, sharing, and writing about Tech.

PROJECTS

Tigg Accounting Software | Frontend

React, NextJs, Typescript, React Hook Form, REST, Konva, Ant design

- Implemented new features and fixed bugs for the ERP software's admin portal
- R&D on building POS System - React | React Konva | Chakra UI | Next.js | Typescript
- Worked on refactoring and improving the code base from class-based to function based
- Extensive integrations with in-house and 3rd party APIs (Zepto Mail)
- Transformed design concepts and wireframes into pixel-perfect interfaces.

Friendsbook Social Media | Fullstack

MERN

A Fullstack social media application with CRUD functionality for posts & users, viewing friends' posts on your timeline, following/unfollowing users, liking/disliking posts, getting news, and follow recommendations.

Sandbox NFT Website | Frontend

React, Tailwind CSS, Coin Ranking API

SandBox is a Modern UX / UI Site that allows you to explore, create, sell, and purchase NFTs. It consists of a tuned blend of multiple complex gradients and graphics.

Avacado Ecommerce website | Frontend

Basics : HTML, CSS, Javascript

It is a Multipage Ecommerce site responsive across all platforms with an attractive modern theme, and complex layered footer. The code is arranged in scalable organized file architecture and is written using the BEM naming convention.
